

Access Reductions by First Adopter States

February 1, 2007

[Since data varied by state or there was uncertainty, low and high amounts are shown. This is not to say that the high amount is not the appropriate amount to use. See notes.]

Observations:

Several states have not submitted data to NARUC yet, so the actual amount of access reductions may be higher than the amounts shown.

Notes:

- 1) These states' information was added or updated since Kansas' initial comments were filed.
- 2) The total of the Average Column is \$3,403.1 compared with \$2,758.4M in initial comments.
